

## Quality Policy

### ISO 9001:2015 POLICY

Polylink Piping Systems Pty Ltd is a privately owned and operated business, specialising in the supply and installation of plastic piping systems. Polylink provide services to the water, waste water, mining, industrial process, power, civil and infrastructure markets.

Polylink understands your need to be sure that your products and services will work – and will keep on working and are committed to ensuring the quality of products and services available is implemented and maintained to the highest possible standards. We aim at consistently not only meeting but exceeding the expectations of our clients.

We will maintain a commitment to quality and ensure its continual improvement. We will also continue to establish and maintain quality objectives and targets for continual improvement to our business.

Consistent with this, top management are committed to:-

- Maintaining certification to ISO 9001 standard.
- Adopting and promoting risk-based thinking and a process-based approach to our business systems and activities.
- Working profitably with all our clients and ensuring all work is carried out in an ethical and legal manner.
- Delivering our products and projects on time and on budget with the intention of satisfying and exceeding the expectations of the client.
- Complying with legal requirements of relevant legislation and applicable standards.

A successful Quality Management System requires the commitment and involvement of everyone concerned, therefore all Polylink employees are required to comply with this policy to ensure the best possible outcome.

## Occupational Health and Safety Policy (OHS)

### ISO 45001:2018 POLICY

Polylink Piping Systems Pty Ltd is committed to the prevention of work-related injury and ill health and achieving the highest performance in Occupational Health and Safety, with the aim of creating and maintaining a safe and healthy working environment across all facets of the business.

Polylink is committed to:-

- Maintaining certification to ISO 45001 standard.
- Seeking continuous improvement in its occupational health and safety performance, considering evolving community, supplier and client expectations, management practices and technology.
- Complying with all applicable laws, regulations and standards and where adequate laws do not exist, apply standards that reflect Polylink's commitment to health and safety.
- Consultation and participation of workers, and involving employees, suppliers and contractors in the improvement of occupational health and safety performances. Polylink believes safety is a shared responsibility. Everyone must perform their duties with the highest regard for not only their safety, but for the safety of others.
- Train and hold individual employees accountable for their area of responsibility.
- Eliminating hazards and reducing risk by implementing management systems to identify, assess, monitor and control hazards and by reviewing performance.
- Ensure that employees, contractors and visitors are informed of and understand their obligations in respect of this policy and;
- Communicate openly with employees, government and the community on occupational health and safety issues and contribute to the development of relevant occupational health and safety policy, legislation and regulations.

## Environmental Policy

### ISO 14001:2015 POLICY

Polylink Piping Systems Pty Ltd is a specialist supplier and installer of plastic piping systems, with varied work across many industries and states. We recognise the expectations of our own staff, suppliers, clients, and the local community in relation to environmental protection.

We are committed to the prevention of pollution and managing our environmental effects and wastes in compliance with our legal obligations.

Furthermore, we will strive to continually improve all our operations and specifically commit to:-

- Maintaining certification to ISO 14001 standard.
- Work to achieve the environmental expectations of our staff, clients, suppliers, and the local community.
- Apply best practice standards for environmental management.
- Use energy and natural resources wisely and efficiently, eliminate and minimise waste, and re-use and recycle where practicable.
- Increase the use of environmentally acceptable materials, equipment, and technology in place of those which are considered harmful.
- Create awareness among our staff and suppliers of the potential environmental effect of operations with which they are involved, and how they can work towards minimising these environmental effects.
- Continue to conduct regular assessments of the environmental effects of work to identify potential areas for improvement, and to follow through with programs to achieve these improvements.
